Reference      3RP-23    GCU Com F #162  
                    BP's Request for Closure  
                    Blagg Sparging and Well Sampling Report January 26, 2001

Mr. Moskal:

OCD has reviewed the files on the release referenced above. The available information shows BP's excavation and remediation efforts have removed BTEX from the groundwater and met the monitoring requirements.

The available information indicates BP has met the requirements of 19.15.29-30 NMAC. No further corrective action is required. This referenced remediation project is closed.

This finding by the OCD does not relieve BP of responsibility if future information shows a threat to ground water, surface water, human health, or the environment. Further, it does not relieve BP of responsibility for compliance with any federal, state, or local law.

Please properly plug remaining monitoring wells per requirements of the New Mexico Office of the State Engineer.  
Thanks.

Respectfully,

Randolph Bayliss, P.E.  
Hydrologist, District III
