Mr. Littrell,

OCD has received the Closure Report for 2RP-5294 Big Eddy Unit 039, thank you. This closure is denied for the following reason:

- Because sample WS01 contained elevated chlorides, the OCD requests an upgradient temporary well be installed for purposes of collecting a background water sample.
-Please obtain OCD approval on location of upgradient well, prior to installation.

Please let me know if you have any questions.

Thank you,

Cristina Eads

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
