**SUBJECT:**

Statewide Permit For  
Union Oil Company Of California  
For Disposal Of Hydrostatic Test  
Water

Union Oil Company of California, dba Unocal, requests a statewide permit from the New Mexico Oil Conservation Division (OCD) for the disposal of fresh water used for testing pipelines constructed of new pipe.

Unocal plans to build any new pipeline system or well-ties with new pipe material. Before hydrostatically testing the lines, Unocal's pipeline contractor will purge these lines of any debris using soft pigs. The lines will be filled and tested with fresh water from an OJO ALAMO source well. Following the hydrostatic test, the lines will again be purged with soft pigs. Each test performed for Unocal will involve volumes less than 100,000 gallons. The tests are more likely to be no greater than 10,000 gallons each. The purged test water will then be used to hold down dust on lease roads. If the roads are already saturated, Unocal will have the water hauled to a state approved disposal facility.

Should you have any questions or need any additional information to process this request, please feel free to contact me at the above letterhead address or phone.

Very truly yours,

Union Oil Company of California  
dba UNOCAL

Subject:

Hydrostatic Test Report  
For Six Month Period  
Ending February 29, 1992

As per the provisions pursuant to Union Oil Company of California, dba Unocal's, authorization to discharge of hydrostatic test water dated November 20, 1991, the following information is being submitted for hydrostatic tests performed during the period November 20, 1991 to February 29, 1992 for tests of new pipe with less than 100,000 gallons of water.

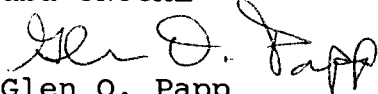

Test #1:

Location:	T-27-N, R-7-W, Section 1 Rio Arriba County
Date of Test:	1/4/92-1/5/92
Volume of discharge:	17,000 Gals
Source of Test Water:	Ojo Alamo - No additives (Water Analysis Attached)

If you have any additional questions or concerns regarding this information, please feel free to contact me at the above letterhead address or at (505) 326-7600.

Very truly yours,

**RE: Renewal of permit for authorization to discharge hydrostatic test water**

Union Oil Company of California, dba Unocal, requests a renewal permit to discharge hydrostatic test water during construction of new pipe in the State of New Mexico. The current permit issued on November 20, 1991, expires on November 20, 1996.

Any future pipeline systems or well-ties will be made with new pipe material. As stated in current permit, Unocal will purge these lines of any debris, using soft pigs, before hydrostatic test begin. The lines will be filled and tested with fresh water from an Ojo Alamo source well. Following the hydrostatic test, the lines will again be purged with soft pigs. Each test performed for Unocal will involve volumes less than 100,000 gallons each. The purged test water will then be used for dust suppression on lease roads. If the roads are already saturated, Unocal will have the water hauled to a state approved disposal facility.

If you have any questions or need additional information to process this request, please contact Brett Ligget at 505-632-1811 Ext. 14 or Mike Tabet at 801-686-7604.

Thank you.

Sincerely,

Union Oil Company of California, dba Unocal

Spoke to Karin. She was Not Sure if  
UNORAL was purchased by Duke or Not.  
She will check into it. However GPM  
was purchased by Duke.
