Re: Hydrostatic Test Water
Discharge Permit (HBP-NM-009)
Annual Report

Dear Mr. Anderson:

Sid Richardson Gasoline Co. is submitting this annual report pursuant to Section 1-201 of the New Mexico Water Quality Control Commission and the conditions as set in our hydrostatic test water discharge permit:

BP-NM-009
Effective 1 / 22 / 98
Expires 1 / 22 / 03

In 1999, there was 1 (one) new pipeline project that required hydrostatic testing. The pipeline installed and tested was new pipe located in Lea County, New Mexico. Please see the attached SRGCo. hydrostatic test water discharge report form.

If there are any concerns or questions pertaining to this report, please do not hesitate to contact me at 817-390-8685 or email rlgawlik@sidrich.com.

Sincerely,

Robert L. Gawlik

Subject: Permit Requirement Met

Robert L. Gawlik:

Thank you for the annual report submitted to the New Mexico OCD on January 17, 2000. This submittal fulfills Sid Richardson Gasoline Company's 1999 annual requirement pursuant to the hydrostatic test water discharge permit HBP-NM-009.

Martyne J. Kieling

Dear Mr. Anderson:

Sid Richardson Gasoline Co. would like to request a renewal of our current five-year authorization for the discharge of hydrostatic test waters in Lea County, New Mexico. Our original request for discharge authorization was submitted pursuant to Section 1-201 of the New Mexico Water Quality Control Commission.

The current authorization was issued by the OCD on January 22, 1993, with the following conditions:

1. This permit is for the testing of newly constructed pipe only. All used pipe must receive discharge approval from the OCD prior to testing. Used pipe is defined as any pipe or section of pipe that has had any hydrocarbon in contact with its walls.
2. The volume per test does not exceed 100,000 gallons.
3. Fresh water from a water supply system or other potable source is used for the test.
4. The discharge does not enter any lake, perennial stream, river or other respective tributaries that may be seasonal.
5. The ground water is not less than ten feet from the surface at the point of discharge.
6. The discharge does not impact adjacent property.
7. The discharge does not cause any fresh water supplies to be degraded or to exceed standards as set forth in Section 3-103A, B and C of the New Mexico Water Quality Control Commission regulations.

Mr. Roger Anderson
RLG-01-98; 01/12/98
Page Two

8. A report summarizing all tests of new pipe with less than 100,000 gallons each will be submitted to the OCD. Because Sid Richardson Gasoline Co. does not install new pipelines on a monthly basis, it would not be in the OCD's or our best interest to submit a "no activity" report on a monthly basis. SRGCo. shall submit a report when new pipe is hydrostatic tested that shall indicate the following:
 1. Location of test; i.e., section, township and range.
 2. Date of the test.
 3. Volume of discharge.
 4. Source and quality of test water.

Your time and attention to this request will be appreciated. If more information is required, please do not hesitate to call me at 817/390-8685.

Sincerely,

Robert L. Gawlik
Environmental Health & Safety Associate
