Dear Mrs. Kieling:

Phillips Pipe Line Company (PPL) hereby requests to renew permit HBP-NM-012 (Re: Discharge of Hydrostatic Test Waters) that allows for the discharge of hydrostatic test waters from new pipelines and new tanks.

PPL will abide by the conditions set forth in the permit.

If you have questions concerning this request, please contact me at (918) 661-3557.

Sincerely,

RE: Discharge of Hydrostatic Test Water Permit HBP-NM-012

Dear Mr. Walker:

The Oil Conservation Division (OCD) has conducted a file review on the Hydrostatic Test Waters Permit HBP-NM-012 for the Phillips Pipeline Company (Phillips). The 5-year Permit **will expire on September 1, 2000**. In addition, permit condition 5 (five) required that a report must be filed every 12 months summarizing the activities and that it shall contain the following information:

- A. Location of test – Section, Township, Range,
- B. Date of test,
- C. Volume of discharge and
- D. Source of test water.

Phillips failed to submit the 12-month reports for 1998, 1999, and 2000. Phillips shall submit hydrostatic discharge 12-month reports for 1998, 1999, and 2000 to the OCD by **October 1, 2000**.

If Phillips wishes to perform hydrostatic tests of 100,000 gallons or less on new pipe they must submit a new application to the OCD.

If there are any questions, please call Martyne Kieling at (505-827-7153).

Sincerely,

Roger C. Anderson
Environmental Bureau Chief

Dear Mrs. Kieling:

Phillips Pipe Line Company (PPL) hereby requests revisions to permit HBP-NM-012 (Re: Discharge of Hydrostatic Test Waters) that will allow for the discharge of hydrostatic test waters from *new* tanks in accordance with the conditions stated in the permit for new pipe.

As discussed in our telephone conversation on November 4, 1998, PPL has replaced WestTEx 66 as the operator for facilities in New Mexico.

If you have questions concerning this request, please contact me at (918) 661-3557.

Sincerely,

A handwritten signature in cursive script that reads "Anthony C. Walker".

**RE: Hydrostatic Test Discharges
5 Year Renewable Permit**

Dear Mr. Eustice:

WestTex 66 Pipeline Company, and Phillips Pipe Line Company hereby request that the New Mexico Oil Conservation Division (OCD) grant a 5 year renewable Hydrostatic Test Discharge Permit authorizing the discharge of hydrostatic test water from new pipelines. If granted, this permit will apply to both WestTex 66 Pipeline Company and Phillips Pipe Line Company facilities.

Hydrostatic test discharge requirements are as follows:

- a) All pipelines authorized for hydrostatic test water discharge will be new.
- b) Hydrostatic tests that result in discharges of test water to the ground will utilize fresh or other potable water and be in volumes no greater than 100,000 gallons per test.
- c) Discharges from tested pipelines will occur on pipeline right-of-ways and will not impact adjacent property.
- d) Hydrostatic test discharges will not reach surface water.
- e) In no instance will discharges occur if groundwater is less than 10 feet from the surface at the point of discharge.
- f) Since fresh or potable water will be used, discharges will not degrade the water quality standards set forth in Water Quality Control Standard 3-103A, B, and C of the New Mexico Water Quality Control Commission Regulations.
- g) A monthly report summarizing all tests of new pipe will be submitted to the OCD. Monthly reports will only be sent for months in which hydrostatic tests are conducted and there is a discharge to the surface. No reports will be sent during months in which no hydrostatic test discharges are made. The report will contain dates, locations, volumes of discharge and source of test water.

Individual hydrostatic test discharge permit applications will be submitted to the OCD if any of the above requirements cannot be met.

Contact me at (918)661-1399 if you have any questions concerning this permit request.

Sincerely,

A handwritten signature in cursive script, appearing to read "S. Maddox".
