**Re: Hydrostatic Test Water Discharge
Lea County, New Mexico**

Dear Mr. Burnett:

The New Mexico Oil Conservation Division (OCD) has received Sid Richardson Gasoline Company's request dated January 18, 2000, for authorization to discharge approximately 18,500 gallons of waste water from the hydrostatic testing of approximately 511' of 12" pipe, 660' of 16" pipe, 300' of 10" pipe, 240' of 6" pipe, and one 6,400 gallon scrubber. The pipe and equipment is a combination of used and new and is located between Jal #4 and Jal #3 Gasoline Plant, Lea County, New Mexico

Based on the information provided in the request and during a phone conversation on January 18, 2000 the hydrostatic test water discharge **is hereby approved** subject to the following conditions:

1. The test water (18,500 gallons) will be discharged by injecting into an OCD approved Class II disposal well operated by Sid Richardson at the Jal #3 Gasoline Plant, Lea County, New Mexico.
2. The test water will be generated at the Jal #4 Gasoline Plant, Lea County, New Mexico.
3. The fluids will not be allowed to migrate to a water of the State or a water of the U.S.

Pursuant to WQCC Regulation 3-106.B, this approval will allow Sid Richardson Gasoline Co. to discharge without an approved discharge plan for a period not to exceed 120 days. If the site is to be used for more than one test discharge, formal re-application must be made. If the discharge exceeds 120 days, a formal discharge plan must be submitted for review.

Please be advised that this approval does not relieve Sid Richardson Gasoline Co. of liability should their operation result in pollution of surface water, ground water, or the environment. In addition, OCD approval does not relieve Sid Richardson Gasoline Co. of responsibility for compliance with other federal, state or local laws and/or regulations.

If there are any questions, please contact me at (505) 827-7153.

Sincerely,

Martyne Kieling
Environmental Geologist

Subject: Permit for Discharge of Hydrostatic Test Water

Ms. Kieling,

This is a request for a permit to discharge hydrostatic test water. The hydrostatic test was conducted on a pipeline that is used in the transfer of raw natural gas. We will test approximately 511' of 12" pipe, 660' of 16" pipe, 300' of 10" pipe, 240' of 6" pipe, and one 6,400 gallon scrubber.

The volume of water involved is approximately 18,500 gallons. The water will be generated at the Jal #4 plant and will be disposed of into an OCD approved Class II disposal well at the Jal #3 Gasoline Plant operated by Sid Richardson.

The nature of the service of this line requires me to ask you to expedite the permitting process as the line will be out of service and causing a considerable reduction in gas volumes until dewatering can be completed.

I have left a voice mail message for Mr. Roger Anderson about this hydro. test.

If there are any questions regarding this matter, I can be contacted at (505) 395-2068.

Thank you,

Jeff Burnett
Plant Engineer

**Re: Hydrostatic Test Water Discharge
Lea County, New Mexico**

Dear Mr. Dunn:

The New Mexico Oil Conservation Division (OCD) has received Sid Richardson Gasoline Company's request dated March 22, 1999, for authorization to discharge approximately 300,000 gallons of waste water from the hydrostatic testing of 16 inch, approximately 5.5 mile section of used pipeline located between Jal #4 and Jal #3 Gasoline Plant, Lea County, New Mexico

Based on the information provided in the request and during a phone conversation on March 24, 1999 the hydrostatic test water discharge is hereby approved subject to the following conditions:

1. The test water (300,000 gallons) will be discharged by injecting into an OCD approved Class II disposal well operated by Sid Richardson at the Jal #3 Gasoline Plant, Lea County, New Mexico.
2. The test water will be generated at the Jal #3 Gasoline Plant, Lea County, New Mexico.
3. The fluids will not be allowed to migrate to a water of the State or a water of the U.S.

Pursuant to WQCC Regulation 3-106.B, this approval will allow Sid Richardson Gasoline Co. to discharge without an approved discharge plan for a period not to exceed 120 days. If the site is to be used for more than one test discharge, formal re-application must be made. If the discharge exceeds 120 days, a formal discharge plan must be submitted for review.

Please be advised that this approval does not relieve Sid Richardson Gasoline Co. of liability should their operation result in pollution of surface water, ground water, or the environment. In addition, OCD approval does not relieve Sid Richardson Gasoline Co. of responsibility for compliance with other federal, state or local laws and/or regulations.

If there are any questions, please call Martyne Kieling at (505) 827-7153.

Sincerely,

Roger C. Anderson
