Subject: H2S complaint

Attached is a report written by Wayne Price on a H2S complaint in T 17 S , R 38 E, Lea Co. The OCD field inspectors monitored the H2S levels twice a day for over two weeks without finding problems.

I agree with Wayne report that as long as the production equipment is working properly there is not a H2S problem.

The reason so much time was spent on this problem was that in the past H2S problems have encountered and the problem was turned in to EPA in Dallas and then returned to us through ED. To assure all of the above that the problem was addressed the attached report by Wayne Price was completed.
