RE: Pure Resources - Lovington Water Field
Pure 106 Site Closure

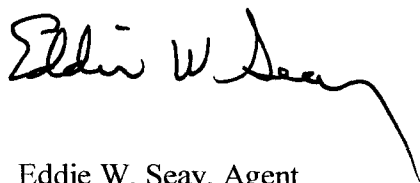

Mr. Price:

Pure Resources has completed the excavation and hauling of the contaminated soil from the Pure 106 site. E.D. Walton, the contractor, hauled 5260 cu. yds. of soil to C & C Landfarm. The analytical for the bottom and sidewalls are within OCD guidelines for closure. A PID was used to conduct headspace test for BTEX and was less than 10 ppm. Larry Johnson was notified of the testing, also the hole is left open for inspection until permission to backfill. Photos and analytical are within.

Pure would like to backfill the excavated area with clean soil, hauled from a site West of Lovington. The area will be cleaned of trash and reseeded with a mixture suitable for this area.

If this is satisfactory with the OCD and the City of Lovington, Pure would like to finalize the closure as soon as possible.

Thanks,

Eddie W. Seay, Agent
