OCD hereby approves of the closure request for the following sites and requires no further action at this time.

1R0442
1R0443
1R0444
1R0448
1R0449

Please be advised that NMOCD approval of this plan does not relieve (Dynegy) of responsibility should their operations fail to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD approval does not relieve (Dynegy) of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: RE: Dynegy

Projects

Dear Cal:

Re: Dynegy Site 55 OCD Case # 1R0449.

OCD hereby approves the closure work plan dated October 27, 2004 with the following conditions:

1. All backfill shall have a TPH of 5000 ppm or less and PID reading of 100 ppm or less.
2. Dynegy shall screen the bottom of the excavation for the highest PID reading and check the vertical extent until PID reading is 100 ppm or less and TPH is 1000 ppm or less.
3. Dynegy shall supply this information in the final closure report with one photo and Lat/long.

Once OCD receives this information we will issue a "No further Action Required".

Please be advised that NMOCD approval of this plan does not relieve (Dynegy) of liability should their operations fail to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD approval does not relieve (Dynegy) of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Thank you for your cooperation in this matter.
