Request to Implement Remedial Action Plan (RAP) AMOCO Production Company San Juan Gravel Tank Battery A #1 SE/4, SE/4 (P) Section 21, T29N, R13W, NMPM Farmington, San Juan County, New Mexico

Dear Mr. Olsen:

On behalf of AMOCO Production Co., this letter is to request permission to implement the RAP to abate hydrocarbon contamination of groundwater at the referenced production and storage facility.

Groundwater contamination was identified during assessment of two pits located at the facility last year. The hydrocarbon contamination at the site is suspected to be from normal operations during drilling and production at the facility. Based on the assessments, a groundwater collection and treatment system is proposed to removed free product and dissolved phase contamination in groundwater. The proposed system has been initially installed minimized the migration offsite of the hydrocarbon to contamination, and a pilot test of the system completed to verify operating conditions.

Enclosed is a copy of the RAP with results of the pilot test. Full implementation of the RAP is awaiting approval from the NMOCD. If you have any questions regarding this request or the RAP please contact us. Thank you for your assistance with this matter.

Respectfully submitted, ENVIROTECH INC

Ų Michael K. Lane, P.E.

Geological Engineer

Attachment: RAP, May 1993
