## **INTRODUCTION**

On behalf of Plains Marketing, L.P., (Plains), NOVA Safety and Environmental (NOVA) is pleased to submit this Annual Monitoring Report in compliance with the New Mexico Oil Conservation Division (NMOCD) letter of May 1998, requiring submittal of an Annual Monitoring Report by April 1 of each year. Beginning on May 29, 2004, project management responsibilities were assumed by NOVA, having previously been managed by Environmental Technology Group, Inc. (ETGI). The TNM 97-18 pipeline release site (the site), formerly the responsibility of Enron Oil Trading and Transportation (EOTT), is now the responsibility of Plains. This report is intended to be viewed as a complete document with figures, appendices, tables and text. The report presents the results of the quarterly groundwater monitoring events conducted in calendar year 2005 only. Historic data is provided on the enclosed data disk. For reference, the Site Location Map is provided as Figure 1.

Groundwater monitoring was conducted during each quarter of 2005 to assess the extent of dissolved phase constituents and Phase Separated Hydrocarbon (PSH). Each groundwater monitor event consisted of measuring static water levels in the monitor wells, checking for the presence of PSH on the water column and the purging and sampling of each well exhibiting sufficient recharge. Monitor wells containing a thickness of PSH greater than 0.01 foot were not sampled.

## **SITE DESCRIPTION AND BACKGROUND INFORMATION**

The TNM 97-18 release occurred on September 10, 1997. The site is located south of Monument, New Mexico in the southwest  $\frac{1}{4}$  of the northeast  $\frac{1}{4}$  of Section 28, Township 20 South, Range 37 East. According to Form C-141, an estimated 83 barrels of crude oil was released from the 16-inch pipeline of which none was recovered. The Release Notification and Corrective Action (Form C-141) is provided as Appendix A. Previous consultants reported approximately 799 cubic yards of impacted soil was excavated from the area around the release point and stockpiled on site.

Currently there are twenty seven (27) monitor wells (MW-1 through MW-30 excluding MW-13, MW-19, and MW-29) and two (2) recovery wells (RW-1 and RW-2) onsite. A pneumatic product recovery system is operating onsite incorporating three monitor wells (MW-4, MW-5 and MW-7). Manual product recovery has been conducted at monitor wells MW-4, MW-5, MW-7, and MW-10 and on recovery wells RW-1 and RW-2 during the 2005 calendar year.

## **FIELD ACTIVITIES**

A measurable thickness of PSH was present in eight (8) monitor wells (MW-2 through MW-7, MW-10, and MW-14) and the two (2) recovery wells (RW-1 and RW-2) during the reporting period. The average thickness of PSH in monitor wells and recovery wells displaying PSH was 0.33 feet. The maximum thickness of PSH in monitor wells and recovery wells was 2.04 feet as recorded in monitor well MW-10 on February 15, 2005. PSH data for the 2005 gauging events can be found in Table 1. Approximately 10.75 gallons of PSH was recovered from the site

during the 2005 reporting period. A total of approximately 1,062 gallons (25.3 barrels) of PSH has been recovered since the start of product inception.

Quarterly monitoring events for the reporting period were performed according to the following reduced sampling schedule, which was approved by the NMOCD in correspondence dated April 28, 2004 and amended by NMOCD correspondence dated June 22, 2005.

NMOCD APPROVED SAMPLING SCHEDULE					
Location	Schedule	Location	Schedule	Location	Schedule
MW-1	Annually	MW-12	Annually	MW-23	Quarterly
MW-2	Quarterly	MW-13	Plugged and Abandoned	MW-24	Quarterly
MW-3	Quarterly	MW-14	Annually	MW-25	Quarterly
MW-4	Quarterly	MW-15	Annually	MW-26	Annually
MW-5	Quarterly	MW-16	Annually	MW-27	Quarterly
MW-6	Quarterly	MW-17	Quarterly	MW-28	Semi-Annually
MW-7	Quarterly	MW-18	Quarterly	MW-29	Plugged and Abandoned
MW-8	Annually	MW-19	Plugged and Abandoned	MW-30	Semi-Annually
MW-9	Annually	MW-20	Annually		
MW-10	Quarterly	MW-21	Annually	RW-1	Quarterly
MW-11	Annually	MW-22	Annually	RW-2	Quarterly

The site monitor wells were gauged and sampled on March 19, June, 17, September 22, and December 20, 2005. During each sampling event, monitor wells were purged of approximately three well volumes of water or until the wells failed to produce water. Purging was performed using a disposable polyethylene bailer for each well or electrical Grundfos Pump and dedicated tubing. Groundwater was allowed to recharge and samples were obtained using disposable Teflon samplers. Water samples were collected in clean glass containers provided by the laboratory and placed on ice in the field. Purge water was collected in a polystyrene tank and disposed of by Key Energy utilizing a licensed disposal facility (NMOCD AO SWD-730).

Locations of the monitor wells and the inferred groundwater gradient, which were constructed from measurements collected during quarterly sampling events performed in 2005, are depicted on the Inferred Groundwater Gradient Maps, Figures 2A-2D. Groundwater elevation data for 2005 is provided as Table 1. Historic groundwater elevation data beginning at project inception is enclosed on the enclosed data disk.

The most recent Groundwater Gradient Map, Figure 2D, indicates a general gradient of approximately 0.008 feet/foot to the southeast as measured between MW-9 and MW-28. This is consistent with data presented on Figures 2A through 2C from earlier in the year. The corrected groundwater elevations ranged between 3468.75 to 3475.53 feet above mean sea level, in monitor wells MW-27 on March 10, 2005 and in MW-6 on February 2, 2005, respectively.

## LABORATORY RESULTS

Monitor wells MW-4, MW-5, MW-7 and MW-10 contained measurable PSH throughout the reporting period and were not sampled. Monitor well MW-2 contained measurable PSH during

the second, third and fourth quarter of 2005 and was not sampled during these quarters. Monitor well MW-3 contained measurable PSH during the third quarter and was not sampled third quarter. Recovery wells RW-1 and RW-2 contained measurable PSH during the second, third and fourth quarters of 2005 and were not sampled in these quarters.

All groundwater samples collected during the reporting period were delivered to TraceAnalysis, Inc. in Lubbock, Texas for Benzene, Toluene, Ethylbenzene, and Xylene (BTEX) constituent analysis using EPA Method SW 846-8021b. Analytical results of BTEX constituent concentrations for 2005 are summarized on Table 2. Historical BTEX constituent concentrations and copies of the laboratory reports for 2005 are provided on the enclosed data disk. The quarterly groundwater analytical results are depicted on the Groundwater Concentration and Inferred PSH Extent Maps, Figures 3A-3D.

Review of laboratory analytical results of the groundwater samples obtained from the thirty two (32) wells (including monitor wells MW-13, MW-19 and MW-29 which were plugged and abandoned in September 2005) present at the site during the 2005 monitoring period indicate that benzene and BTEX constituent concentrations were below NMOCD regulatory standards in seventeen wells (MW- 1, MW-8, MW-9, MW-11 through MW-16, MW-19 through MW-22, MW-26, MW-27, MW-29, and MW-30). Of these seventeen (17) wells, monitor wells MW-13, MW-19, and MW-29 were plugged and abandoned on September 13, 2005. Four (4) monitor wells (MW-4, MW-5, MW-7, and MW-10) contained PSH during each quarterly sampling event and were not sampled. Analytical results indicate six (6) monitor and recovery wells (MW-2, MW-3, MW-23, MW-25, MW-28, and RW-2) displayed benzene concentrations above the NMOCD regulatory standard while total BTEX constituent concentrations were below the NMOCD regulatory standard. The remaining five (5) monitor and recovery wells (MW-6, MW-17, MW-18, MW-24, and RW-1) displayed benzene and total BTEX constituent concentrations above the appropriate NMOCD regulatory standard.

Laboratory analytical results were compared to NMOCD regulatory limits based on the New Mexico groundwater standards found in section 20.6.2.3103 of the New Mexico Administrative Code.

## SUMMARY

This report presents the results of monitoring activities for the 2005 annual monitoring period. Currently, there are twenty seven (27) groundwater monitor wells (MW-1 through MW-30, excluding MW-13, MW-19, and MW-29) and two (2) product recovery wells (RW-1 and RW-2) on-site. Manual product recovery occurs on a bi-weekly schedule. Groundwater elevation contours generated from water level measurements acquired indicated a general gradient of approximately 0.008 feet/foot to the southeast.

As discussed above, eight (8) monitor wells and two (2) recovery wells contained measurable PSH thicknesses in 2005. Approximately 10.75 gallons of PSH was recovered from the site during the 2005 reporting period. A total of approximately 1,062 gallons (25.3 barrels) of PSH has been recovered since product inception. The average thickness of PSH in monitor wells and recovery wells during the reporting period was 0.33 feet.

Four (4) monitor wells contained PSH during each sampling event of 2005 and were not sampled. Two (2) monitor wells and two (2) recovery wells contained PSH during at least one quarterly sampling event and were not sampled during those quarters. Seventeen (17) monitor well locations exhibited benzene and total BTEX constituent concentrations below the NMOCD regulatory standards. Six (6) locations exhibited benzene concentrations above the NMOCD regulatory standard while total BTEX constituent concentrations were below the NMOCD regulatory standard. The remaining five (5) locations exhibited concentrations of both benzene and total BTEX constituent concentrations above the appropriate NMOCD regulatory standards.

### **ANTICIPATED ACTIONS**

A Site Restoration Work Plan and Proposed Soil Closure Strategy will be submitted to the NMOCD in 2006, to address the impacted and/or excavated soil remaining on site. Any soil proposals will be addressed under separate cover from this report and will be submitted to the NMOCD prior to the commencement of excavation or backfilling activities.

### **LIMITATIONS**

NOVA has prepared this Annual Monitoring Report to the best of its ability. No other warranty, expressed or implied, is made or intended.

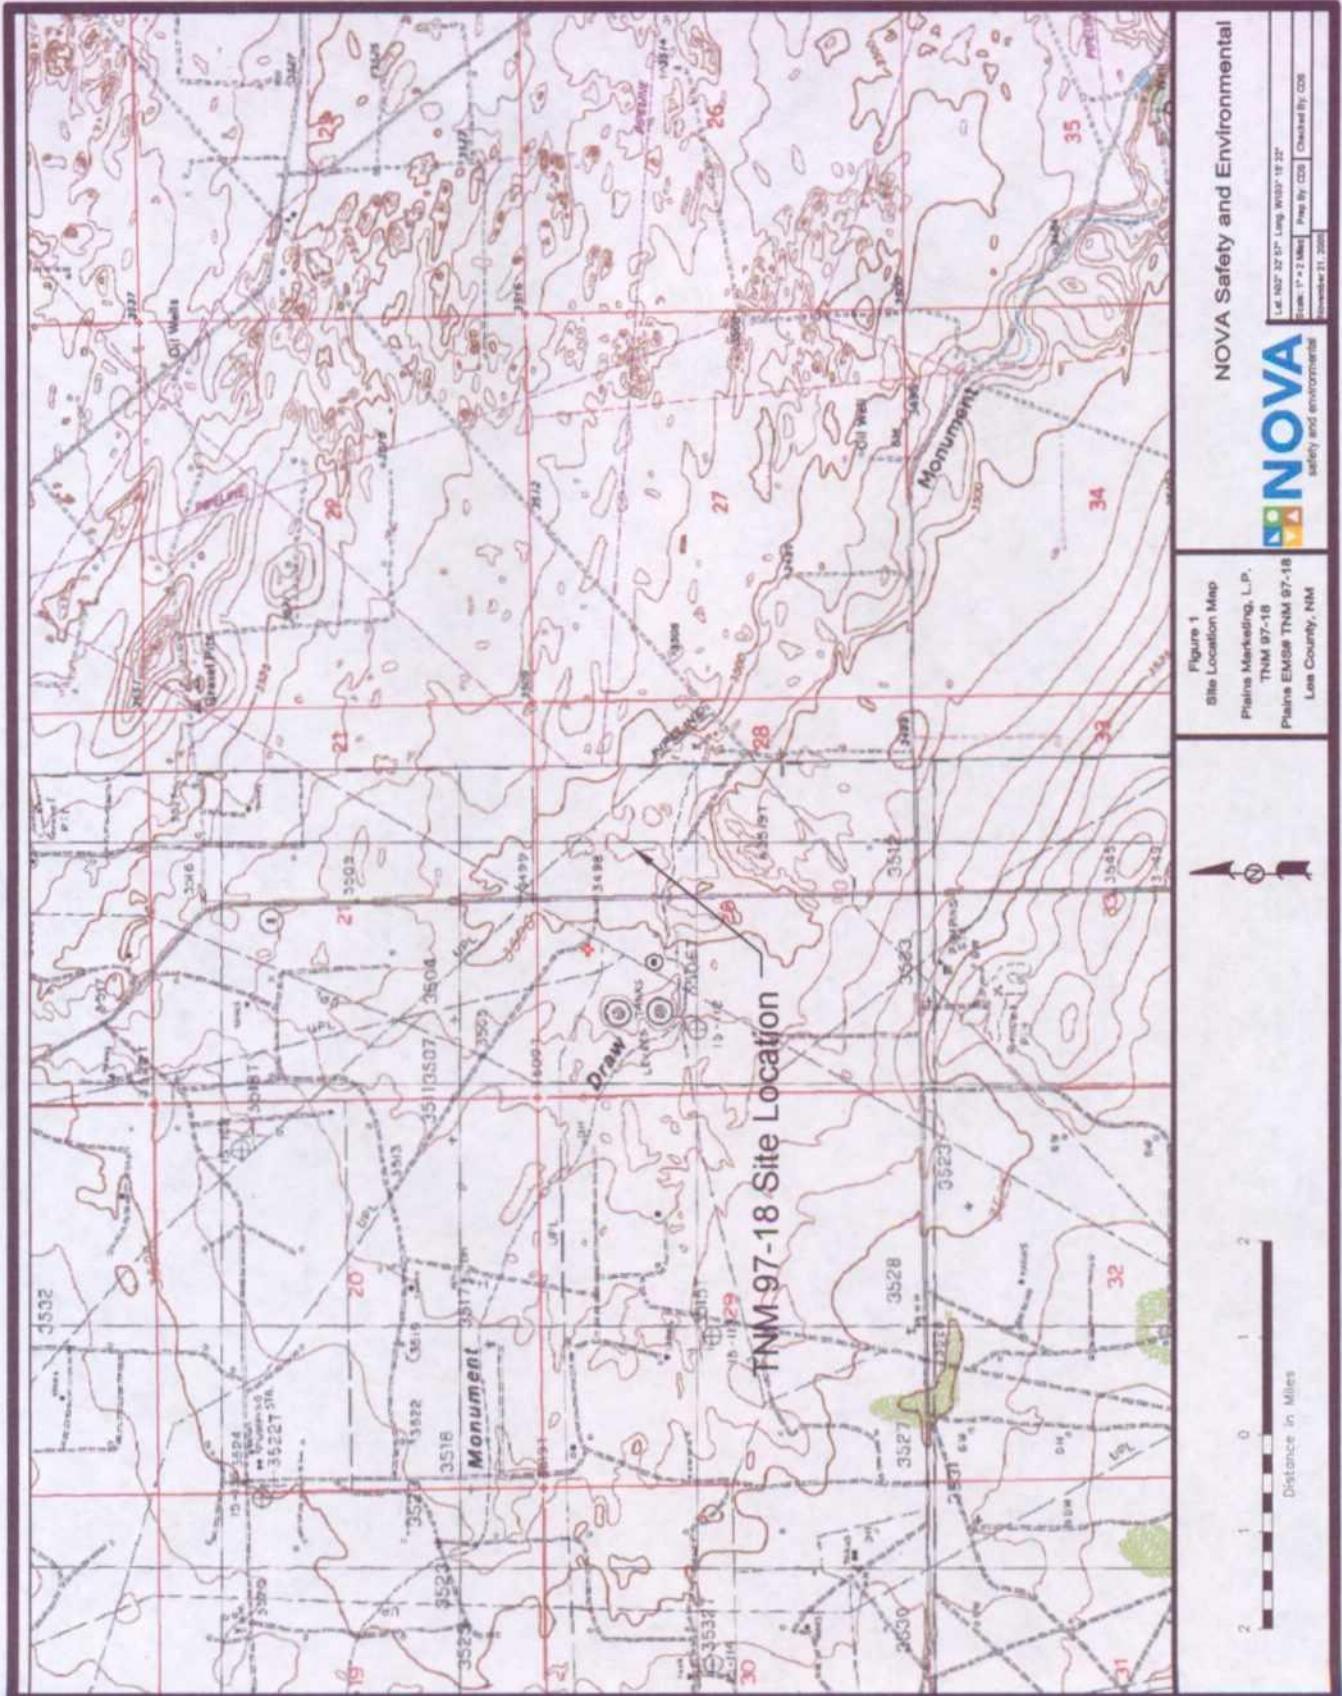

NOVA has examined and relied upon documents referenced in the report and has relied on oral statements made by certain individuals. NOVA has not conducted an independent examination of the facts contained in referenced materials and statements. We have presumed the genuineness of the documents and that the information provided in documents or statements is true and accurate. NOVA has prepared this report, in a professional manner, using the degree of skill and care exercised by similar environmental consultants. NOVA also notes that the facts and conditions referenced in this report may change over time and the conclusions and recommendations set forth herein are applicable only to the facts and conditions as described at the time of this report.

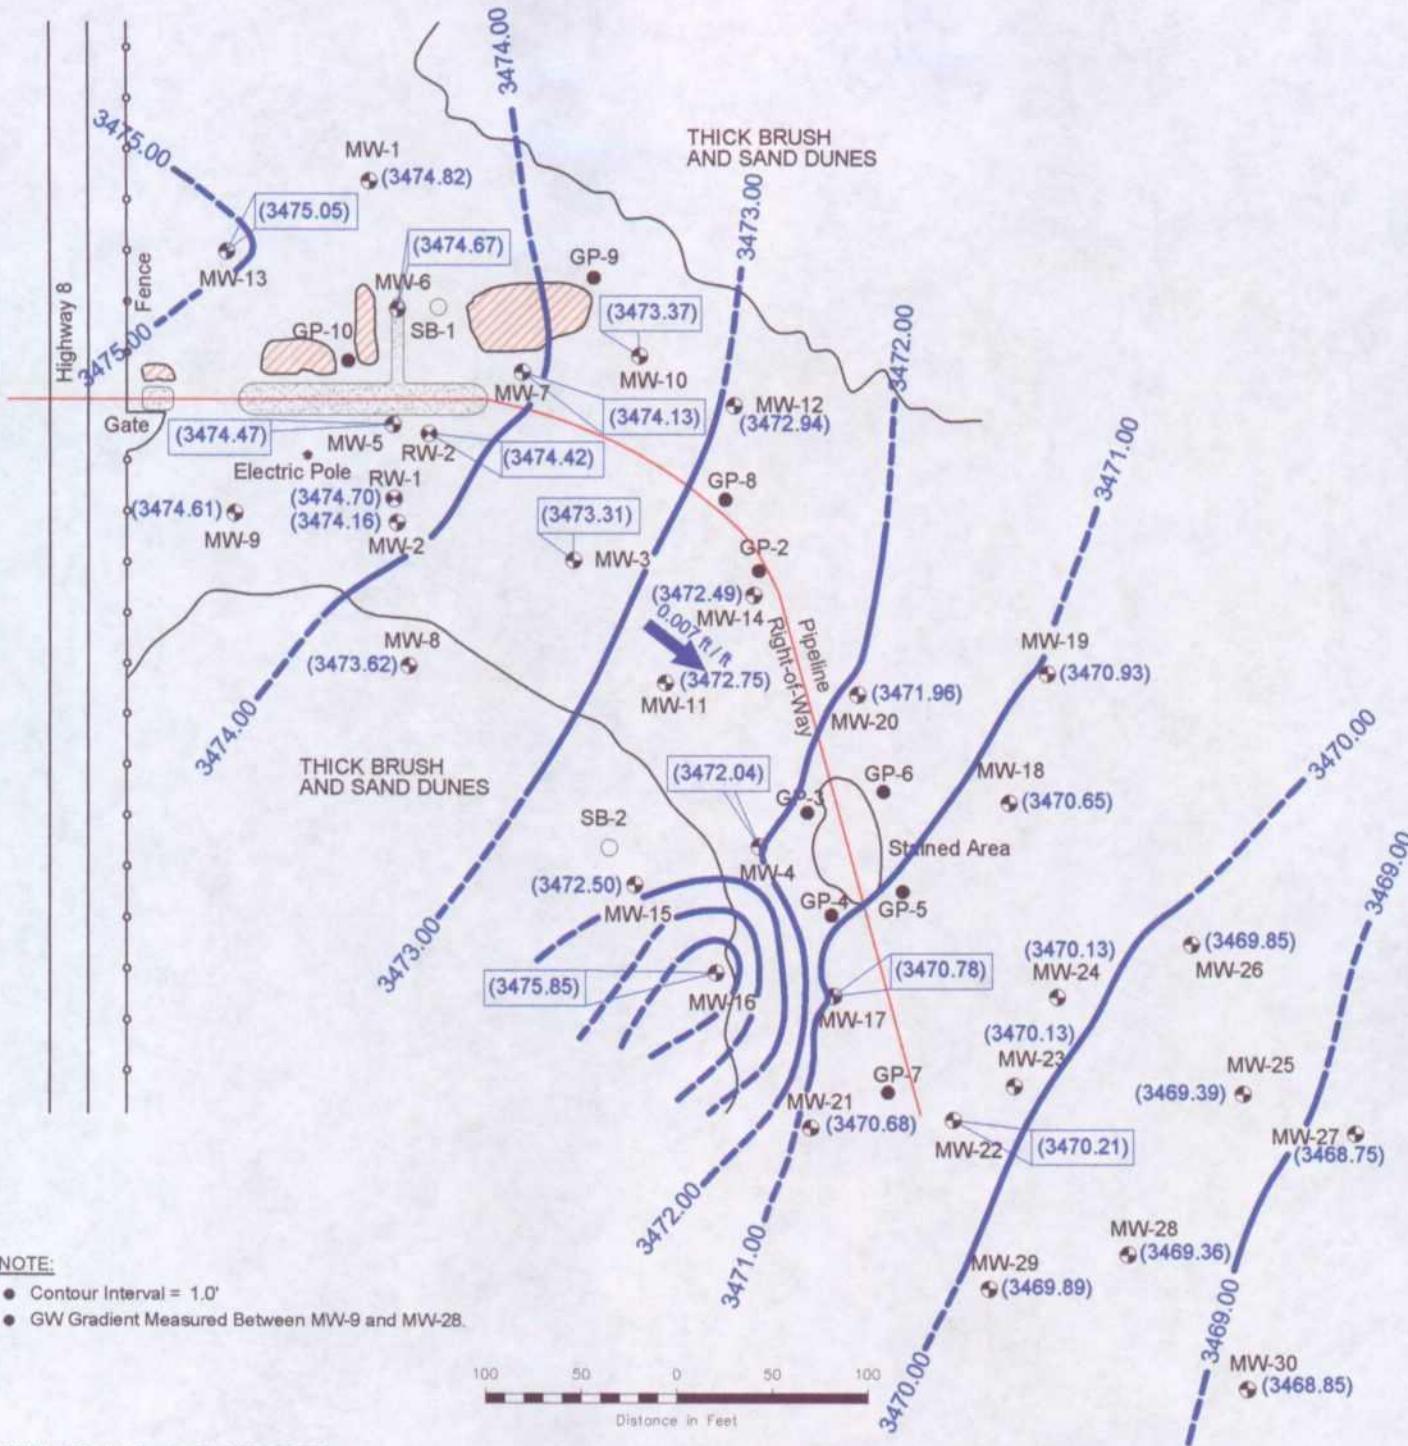

This report has been prepared for the benefit of Plains. The information contained in this report, including all exhibits and attachments, may not be used by any other party without the express consent of NOVA and/or Plains.

**Re: Plains Pipeline – Plugging and Abandonment of Monitor Wells  
8 Sites in Lea County, New Mexico**

Dear Mr. Martin:

Please find attached for your review the Plugging and Abandonment of Monitor Wells Reports for the following Plains sites:

Bob Durham	Section 32, Township 19 South, Range 37 East, Lea County
Darr Angell #2	Sections 11 and 14, Township 15 South, Range 37 East, Lea County
HDO 90-23	Section 6, Township 20 South, Range 37 East, Lea County
TNM Monument 17	Section 29, Township 19 South, Range 37 East, Lea County
TNM Monument 18	Section 7, Township 20 South, Range 37 East, Lea County
TNM 97-04	Section 11, Township 16 South, Range 35 East, Lea County
AP-13 TNM 97-18	Section 28, Township 20 South, Range 37 East, Lea County
SPS-11	Section 18, Township 18 South, Range 36 East, Lea County

If you have any questions or require further information, please contact me at (505) 441-0965.

Sincerely,

Re: Notification of Plugging and Abandonment of Monitor Wells  
TNM 97-18  
SW ¼, NE ¼, Section 28, T-20-S, R-37-E  
Lea County, NM

Dear Mr. Martin,

NOVA Safety and Environmental (NOVA), on behalf of Plains Marketing, L.P. (Plains) respectfully submits the following notification of plugging and abandonment of monitor wells at the Plains TNM 98-17 leak site (the site), located in the SW ¼, NE ¼, Section 29, T-20-S, R-37-E in Lea County, NM.

On September 13, 2005, three (3) monitor wells were plugged and abandoned at the site. Please reference your letter to Ms. Camille Reynolds of Plains Marketing L.P. dated June 22, 2005.

The monitor wells were plugged and abandoned by Environmental Plus, Inc of Eunice, New Mexico, a licensed water well driller in the State of New Mexico. The monitor wells were plugged utilizing guidelines set forth by the office of the New Mexico State Engineer.

Monitor well MW-13 was filled with approximately two (2) bags of bentonite pellets to a depth of approximately one (1) foot below ground surface (bgs) and properly hydrated with water. Topsoil was placed above the former monitor well to complete the procedure.

Monitor well MW-19 was filled with approximately two (2) bags of bentonite pellets to a depth of approximately one (1) foot below ground surface (bgs) and properly hydrated with water. Topsoil was placed above the former monitor well to complete the procedure.

Monitor well MW-29 was filled with approximately two and a half (2½) bags of bentonite pellets to a depth of approximately one (1) foot below ground surface (bgs) and properly hydrated with water. Topsoil was placed above the former monitor well to complete the procedure.

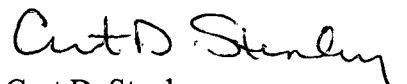

The former monitor well location is as follows:

- MW-13, 32 degrees, 32.957" N, 103 degrees, 15.363" W
- MW-19, 32 degrees, 32.920" N, 103 degrees, 15.279" W
- MW-29, 32 degrees, 32.372" N, 103 degrees, 15.283" W

Plains has completed the approved plugging and abandonment of the above referenced monitor well as directed by the New Mexico Oil Conservation Division (NMOCD). Plains will continue to gauge and sample the remaining monitor wells at the site.

In the future, Plains may make additional requests to the NMOCD for plugging and abandonment of monitor well(s) at this site, as warranted.

Sincerely,

Curt D. Stanley

Re: 2004 Annual Monitoring Report  
TNM 97-18 Release Site  
SW/4 NE/4 of Section 28, Township 20 South, Range 37 East  
Lea County, New Mexico  
Plains EMS Number: TNM 97-18-Known  
NMOCD Reference AP-0013

Dear Ms. Reynolds:

The New Mexico Oil Conservation Division (NMOCD) has received and reviewed the above report submitted on behalf of Plains Marketing, L.P. (Plains) by Nova Safety and Environmental and dated April 2005. This report is accepted with the following understandings and conditions:

1. Quarterly sampling and annual reporting will continue throughout 2005.
2. Product recovery will continue throughout 2005.
3. Plains may plug and abandon monitor wells MW-13, MW-19, and MW-29 using a slurry of 3% - 5% bentonite.
4. Monitor wells MW-22 and MW-26 may be placed on an annual sampling schedule.
5. Plains will develop a work plan to address the impacted and/or excavated soil remaining on site, and submit such plan to the NMOCD Santa Fe office prior to commencing any additional soil work.

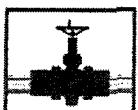

NMOCD acceptance does not relieve Plains of responsibility should its operations at this site prove to have been harmful to public health or the environment. Nor does it relieve Plains of its responsibility to comply with the rules and regulations of any other federal, state, or local governmental entity.

Santa Fe, New Mexico 87505

Re: Plains All American – Annual Monitoring Reports  
21 Sites in Lea County, New Mexico

Dear Mr. Martin:

Plains All American is an operator of crude oil pipelines and terminal facilities in the state of New Mexico. Plains All American actively monitors certain historical release sites exhibiting groundwater impacts, consistent with assessments and work plans developed in consultation with the New Mexico Oil Conservation Division (NMOCD). In accordance with the rules and regulations of the NMOCD, Plains All American hereby submits our Annual Monitoring reports for the following sites:

LF-59	Section 32, Township 19 South, Range 37 East, Lea County
TNM 97-04	Section 11, Township 16 South, Range 35 East, Lea County
HDO 90-23	Section 06, Township 20 South, Range 37 East, Lea County
Darr Angell 2	Section 11,14, Township 15 South, Range 37 East, Lea County

## PLAINS ALL AMERICAN

Nova prepared these documents and has vouched for their accuracy and completeness, and on behalf of Plains All American, I have personally reviewed the documents and interviewed Nova in order to verify the accuracy and completeness of these documents. It is based upon these inquiries and reviews that Plains All American submits the enclosed Annual Monitoring Reports for the above 21 facilities.

If you have any questions or require further information, please contact me at (505) 441-0965.

Sincerely,

*Camille Reynolds* for CR
