**GENERAL  
CORRESPONDENCE**

**YEAR(S):**

2006-2005

**Hansen, Edward J., EMNRD**

---

**From:** Gilbert Van Deventer [gilbertvandeventer@cox.net]  
**Sent:** Wednesday, December 06, 2006 11:13 AM  
**To:** Hansen, Edward J., EMNRD; Johnson, Larry, EMNRD  
**Cc:** Price, Wayne, EMNRD; Kristin Pope; Carolyn Haynes; Scott Curtis  
**Subject:** EME D-1 Junction Box site (AP-67)

The purpose of this email is to serve as notification to the NMOCD that an additional monitoring well will be installed at the EME D-1 Junction Box site located at T20S-R36E, Section 1, Unit Letter D. This work is being conducted in accordance with the NMOCD-approved Stage 1 Abatement Plan (AP-67) for this site. The start date is scheduled for Dec 15th, however due to the unknown availability of the required drilling rig during implementation of work at several other sites that week the work at the D-1 site could commence as early as December 13th or 14th. Work might also have to be postponed to the following week on December 18 if the other projects are not completed on the dates scheduled. If either is the case a phone call will be made to the Hobbs District OCD office as soon as any changes in the begin date for this project is known.

If you have any questions please contact me or Kristin Pope at 505-393-9174.

Thank you,  
Gil

Santa Fe, New Mexico 87504

RE: EME jct. D-1  
PUBLIC NOTIFICATION  
NMOCD CASE #1R0427-128

Mr. Price:

In accordance with Rule 19 (Section 19.15.1.19 NMAC, Subsection G) Public Notice requirements, please accept the enclosed copies of proof that the appropriate individuals and entities were notified of the Stage 1 Abatement Plan submitted by Gilbert J. Van Deventer of R.T. Hicks Consultants for the D-1 Junction Box Site.

Notices were sent via certified mail to landowners within the prescribed radius and return receipts were received for all landowners, indicating that the mailing was received. Mailings were also sent to the Lea County Commission and the list of Interested Parties found on the New Mexico Oil Conservation Division (OCD) website. Delivery to the U.S. Forest Service could not be confirmed so the document was sent via electronic mail (e-mail) to the address provided on the List. Forty-two total notifications were sent and two were not delivered. The notification to Mike Schultz of the International Technology Corp. (from the OCD Interested Parties list) was returned as "attempted—not known." Previous delivery attempts to this address have been refused. The delivery attempt to the Harry and Scott Klein Estate of Hobbs was also unsuccessful; however, the caretaker of this estate is George L. Klein who received a separate notification to his Grand Prairie, Texas address. A summary of the delivery status of these notifications is enclosed.

As directed by OCD, the Stage 1 Abatement Plan notifications were published in the *Albuquerque Journal* and the *Hobbs News-Sun* newspapers. Affidavits for these publications are enclosed.

ROC requests that OCD consider public notice complete for this site. Should you have any further questions regarding this request, do not hesitate to contact me. Thank you for your consideration.

ROC is the service provider (operator) for the Eunice Monument Eumont (EME) SWD System and has no ownership of any portion of the pipeline, well, or facility. The System is owned by a consortium of oil producers, System Partners, who provide all operating capital on a percentage ownership/usage basis.

LEGAL NOTICE

December 28, 2005

NOTICE OF PUBLICATION

State of New Mexico  
Energy, Minerals and Natural Resources Department  
Oil Conservation Division

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 1 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 1220 S. St. Francis Dr., Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

Rice Operating Company, Carolyn Doran Haynes, Engineering Manager, Telephone (505) 393-9174, 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage 1 Abatement Plan Proposal for the Pipeline Junction EME D-1, located in Section 1, Township 20 south, Range 36 east, Lea County, New Mexico, approximately 3 miles west of Monument, New Mexico. Rice Operating Company operates a saltwater disposal pipeline at the site. Soil impacts at the site include chlorides. Groundwater samples exhibit elevated chloride concentrations. The Stage 1 Abatement Plan Proposal presents the following site soil and groundwater investigation activities: Perform a one-mile water well inventory, further delineation of the vertical and lateral extent of soil impact, and inventory, further delineation of the vertical and lateral extent of soil impact, and investigation of groundwater impacts.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage 1 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 1 Abatement Plan, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted to him.

ACCOUNT NUMBER 082274

CLA-22-A (R-1/93)

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 1 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 1220 S. St. Frank Dr., Santa Fe, New Mexico 87505. Telephone (505) 476-3440.

Rice Operating Company, California, 1220 West Talcott, Hobbs, New Mexico 88240, has submitted a Stage 1 Abatement Plan Proposal for the Pipeline Junction EME D-1, located in Section 1, Township 20 south, Range 36 east, Lea County, New Mexico, approximately 3 miles west of Moriarty, New Mexico. Rice Operating Company operates a saltwater disposal pipeline at the site. Soil impacts at the site include craters, groundwater samples exhibit elevated chloride concentrations. The Stage 1 Abatement Plan Proposal presents the following site and groundwater investigation activities: Perform a one-mile water well inventory, further delineation of the vertical and lateral extent of soil impact, and investigation of groundwater impacts.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage 1 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division District Office, 1625 N. French Drive, Hobbs, New Mexico 88240. Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 1 Abatement Plan, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted in writing.

## **NOTICE OF PUBLICATION**

**State of New Mexico  
Energy, Minerals and Natural Resources Department  
Oil Conservation Division**

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 1 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 1220 S. St. Francis Dr., Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

Rice Operating Company, Carolyn Doran Haynes, Operations Engineer, Telephone (505) 393-9174, 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage 1 Abatement Plan Revision Proposal for the Pipeline Junction EME D-1, located in Section 1, Township 20 south, Range 36 east, Lea County, New Mexico, approximately 3 miles west of Monument, New Mexico. Rice Operating Company operates a saltwater disposal pipeline at the site. Soil impacts at the site include chlorides. Groundwater samples exhibit elevated chloride concentrations. The Stage 1 Abatement Plan Proposal presents the following site soil and groundwater investigation activities: Perform a one-mile water well inventory, further delineation of the vertical and lateral extent of soil impact, and investigation of groundwater impacts.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage 1 Abatement Plan Revision Proposal may be viewed at the above address or at the Oil Conservation Division District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 1 Abatement Plan, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted to him.

## 1.0 EXECUTIVE SUMMARY

The D-1 Junction Box site is operated by Rice Operating Company (ROC) and is located in Township 20 South, Range 36 East, Section 1, unit letter D approximately 3 miles west of Monument, NM. This Stage 1 Abatement Plan incorporates the preliminary findings from previous investigations and contents of the previously submitted Investigation and Characterization Plan (ICP) and recommendations for additional assessment activities to satisfy the required elements of a Stage 1 Abatement Plan in accordance with New Mexico Oil Conservation Division (OCD) Rule 19.

Identification of soil and ground water impacts occurred during line replacement being performed as part of the approved Junction Box Upgrade Program in October 2004. Vadose zone samples taken from trenches show a maximum chloride concentration of 9,097 mg/kg at a depth of 12-feet below ground surface (bgs) directly beneath the former junction box. A chloride concentration of 1,120 mg/kg was analyzed from a vadose zone sample collected at 35-feet bgs in monitoring well (MW-1) located approximately 20-feet south of the former junction box, just outside of the excavated area. The depth to ground water at the site is about 35-feet below land surface. The total dissolved solids (TDS) in ground water at the on-site monitoring well is greater than 30,000 mg/L, similar to water quality in certain up gradient monitoring wells at the Climax Chemical site. Chloride, sulfate, and TDS concentrations in monitoring well MW-1 have consistently decreased since the initial sampling event.

We propose the work elements described in detail in Section 7.0 to delineate the extent and magnitude of regulated constituents of concern in the vadose zone and to determine the degree that any migration of constituents have impacted ground water quality relative to documented regional ground water impairment. The constituents of concern are chloride, sulfate, and TDS. Although existing data show that benzene, toluene, ethylbenzene, and xylenes (BTEX) are not present in the vadose zone or ground water, this proposal includes testing for these constituents. The purpose of these work elements is to assist ROC in selecting the soil and/or ground water remedy that is commensurate with any contribution from the D-1 Junction Box site to the documented regional ground water impairment. The proposed work elements are summarized below:

- Define regional ground water flow direction, potential sources of chloride in ground water and ambient ground water chemistry
- Expand our ground water characterization to include evaluation of monitoring data from other ground water investigation sites in the area (Monument Gas Plant, Climax Chemical, etc).
- Install additional soil borings and monitoring wells for evaluation of constituents of concern in the vadose zone and ground water.

When implementing any proposed remedy or investigative work, ROC will confirm that there is a reasonable relationship between the benefits created by the proposed remedy or assessment and the economic and social costs.

ROC is the service provider (operator) for the EME SWD System (The System) and has no ownership of any portion of the pipelines, wells, or facilities. The System is owned by a consortium of oil producers, (System Partners) who provide all operating capital on a percentage ownership/usage basis. Environmental projects of this magnitude require System Partner Authorization for Expenditure (AFE) approval and work begins as funds are received. In general, project funding is not forthcoming until OCD approves the work plan.

RE: Junction D-1, T20S, R36E, Section 1, Unit D; NMOCD Case # Not Yet Assigned

Dear Mr. Price,

On behalf of Rice Operating Company, R.T. Hicks Consultants, Ltd. is pleased to submit the Stage I Abatement Plan for the above-referenced site. Text for Rice Operating Company's proposed public notice is attached to this letter. CD copies of this email follow via FedEx. If you have any questions or concerns, please do not hesitate to contact us.

Sincerely,

R.T. Hicks Consultants, Ltd.

Hobbs, New Mexico 88240

Re: Sites with confirmed Groundwater Contamination

Dear Ms. Haynes:

Pursuant to the New Mexico Oil Conservation Division rule 19.15.1.19 (Rule 19) Prevention and Abatement of Water Pollution requires all responsible persons who are abating water pollution in excess of the standards shall do so pursuant to an abatement plan approved by the director.

Therefore, Rice Operating Company is hereby required to submit individual abatement plans for OCD approval by July 15, 2005 for each of the following sites:

**EME Sites:**

H-13	UL	H	Sec 13, T20s, R36E	1R0429
