Re: Application for 160-acre Non-Standard
Gas Proration Unit, Eumont Gas Pool,
Comprising S/2 of N/2, Section 29,
T-20-S, R-37-E, Lea County, New Mexico

Oil Conservation Commission
State of New Mexico
Santa Fe, New Mexico

Gentlemen:

On December 1, 1954, Gulf Oil Corporation made written application for an exception to the Conservation Commission's Order R-520 in regard to the creation of a 320-acre non-standard gas proration unit in the Eumont Gas Pool to be located in Section 29, T-20-S, R-37-E, Lea County, New Mexico. By your letter of January 11, 1955, you informed Gulf that according to Rule 5 (a) paragraph 3 of Order R-520 the maximum acreage that could be assigned to our Amos B. Reeves Lease Well No. 2 is 160 acres because of the well's location in respect to the north and west boundaries.

Therefore, Gulf Oil Corporation hereby resubmits its application for approval of a non-standard gas proration unit comprising the S/2 of the N/2, Section 29, T-20-S, R-37-E, Lea County, New Mexico, and in support thereof states the following facts:

- (1) Gulf Oil Corporation is the owner and operator of an oil and gas lease known as the Amos B. Reeves Lease, a portion of which comprises the 160 acres above described.
- (2) The Amos B. Reeves No. 2 located 1980 feet from the north line and 660 feet from the west line, Section 29, T-20-S, R-37-E, Lea County, New Mexico, was originally completed on July 20, 1937, as an oil well in the Eunice-Momment Pool. This well has been plugged back from a total depth of 3840 feet to a depth of 3634 feet and on November 26, 1954, was recompleted as a gas well in the Eumont Gas Pool. The applicant proposes to use this well as the unit well.

1-17-55

(3) The proposed non-standard gas proration unit will meet the requirements of Rule 5 (b) of the Oil Conservation Commission Order No. R-520 as follows:

- (a) Contiguous quarter-quarter sections will comprise the unit.
- (b) The proposed unit lies wholly within a single governmental section.
- (c) All acreage within the proposed unit may reasonably be presumed productive of gas.
- (d) The length or width of the proposed unit does not exceed 5280 feet.
- (e) By copy of this letter of application all operators owning interests in the section in which the proposed unit is located and all operators within 1500 feet of the proposed unit well are notified by registered mail of the intent of Gulf Oil Corporation to form the proposed non-standard gas proration unit. (See attached affidavit)

In view of the existence of the facts herein stated and compliance with the provisions of Rule 5 (b) of the Oil Conservation Commission's Order No. R-520, Gulf Oil Corporation requests that the Secretary of the Commission approve the above described non-standard gas proration unit.

Respectfully submitted,

GULF OIL CORPORATION
