**GENERAL
CORRESPONDENCE**

YEAR(S):

2000 - 1999

Olson, William

From: m. harvey [SMTP:markh@ditell.com]
Sent: Tuesday, September 05, 2000 1:46 PM
To: Olson, William
Subject: Annual Groundwater Report (PNM)

As a follow-up to our telephone conversation last week, this serves to acknowledge the extension of time that NMOCD has granted Williams in order to submit the annual groundwater report for former PNM sites.

It is agreed that the report will be submitted by September 15, 2000 and include data from PNM efforts during 1999 and 2000. Williams appreciates the time extension and NMOCD's understanding of the complications associated with inheriting a project of this magnitude.

After submitting the report and allowing review time, Williams intends to schedule a meeting with you to discuss its' plan to effect mitigation of groundwater impacts. Your feedback will be helpful in finalizing a program strategy.

Thank you for your consideration.

Subject: Groundwater Report Extension

Per our discussion today, this note is to confirm extension of the Annual Groundwater Report submittal from July 15, 2000 to August 31, 2000.

On March 4, 2000, Maureen Gannon of PNM emailed you and requested the April 1, 2000 deadline for the report submittal be postponed to July 15, 2000 so that PNM could incorporate all information gathered through June 30, 2000 into the report. Since then, PNM and Williams have entered into a Settlement Agreement transferring certain responsibilities to Williams. The responsibility of the preparation of this report is currently under discussion between PNM and Williams. Regardless of the responsibility, it is clear to me that this report will not be ready by the July 15, 2000 deadline.

Thank you for your assistance in this matter.

Ingrid Deklau

Subject: Request for Extension on Annual Groundwater Report

As a follow-up to our phone conversation on Thursday, March 2, 2000, PNM herein requests an extension of the date for submittal of our San Juan Basin Annual Groundwater Report. The report is normally due on April 1st of each year. However, since PNM's environmental obligations associated with the purchase and sale of our former gas assets in the San Juan Basin will terminate on June 30, 2000 (with the exception of retained liabilities), we would like to file our annual report by July 15, 2000 so that the data and information contained in the annual report is current through the June 30th date.

Please let me know if this extension is acceptable to you. You may email me or call me at (505) 241-2974. Thank you for your time and consideration of this matter.

RE: 1999 SAN JUAN BASIN ANNUAL GROUNDWATER REPORT

Dear Bill:

PNM is pleased to submit the 1999 Annual Groundwater Report on Unlined Surface Impoundments in the San Juan Basin. Pursuant to PNM's Groundwater Management Program for Unlined Surface Impoundment Closures, the report details the ongoing investigation/remedial activities at unlined surface impoundments having groundwater contamination as identified by PNM. A list of groundwater sites reported in this document is provided below.

Blanco Wash Drip	Mangum 1E
Davis 1	McClanahan 22
Dogie East Pit	McClanahan A 2E
Dogie North Pit	McCoy Gas Com A1
Florance 124	Miles Federal 1E Drip
Florance 32A	O' Shea 1M
Florance 40	Patterson A Com A1
Florance 44	Pritchard 2
Florance M 47X	Randleman 1
Hampton 4M	Reid 16 Drip
Honolulu Drip	Turner 1A
Ice Canyon Drip	Wilmerding 1M
Jacques 2A	Zachry 18E
Jicarilla Contract 147-6	
Linda 1A	

Consistent with PNM's San Juan Basin Groundwater Management Plan, PNM will request closure of four of the above sites, the Florance 32A, Jacques 2A, Mangum 1E and the McClanahan A2E, with the submittal of the 1st Quarter 1999 Pit Closures Report. This request is based upon the analytical data collected over the last two years at each of the sites. BTEX concentrations have been consistently below WQCC standards for four consecutive quarters.

Upon approval of the groundwater closure report, PNM will plug and abandon all of the groundwater monitoring wells at each of the locations. The concrete pad and metal vault surrounding each well will be removed. The well casing will be cut to ground surface and each well will be plugged to the surface

Groundwater Site Summary Report

Quarter/Year: 2nd/98, 3rd/98, 4th/98 & 1st/99

Operator: Burlington Resources
Sec: 11 Twn: 31N R: 12W Unit: E
Canyon: Farmington Glade

Vulnerable Class: Expanded
OCD Ranking: 30
Lead Agency: NMOCD

Topo Map: previously submitted
Well Completion Diagram: NA (not applicable at this time)
Site Map with Analytical Results: NA
Groundwater Contour Map: NA
Hydrograph: NA
Full-suite of Groundwater Sampling Results: NA
Analytical Results: NA

Site Hydrology:

The Davis 1 site lies in a wash known as Farmington Glade, which is a southwest-draining area about six miles south of the Colorado border. The site lies on the eastern side of the valley floor at an elevation of about 6205 ft. amsl. It is about one mile downstream from the Patterson A Com A1 site, which is included in this groundwater report.

A vertical extent borehole was drilled beneath the excavation pit in February, 1999. Subsurface materials are composed of fine, silty sands which are relatively uniform to about 65 feet. Groundwater was encountered at a depth of about 60 feet.

Until monitor wells are installed, groundwater flow direction cannot be ascertained. However, it is expected to be generally southward, parallel to surface topography and the direction of stream flow in the Farmington Glade wash.

Activities for Previous Year:

On March 12, 1999, PNM provided written notification to the OCD regarding groundwater contamination at the Davis 1. Since that time, no further activity has taken place.

Results:

NA

Future Actions:

PNM will conduct future activities at the Davis 1 pursuant to the Groundwater Management Plan.

RE: NOTIFICATION OF GROUNDWATER CONTAMINATION- DAVIS #1

Dear Bill:

Pursuant to New Mexico Water Quality Control Commission (WQCC) Regulations, section 1-203, PNM hereby provides written notification of groundwater contamination at the Davis #1, located in S11 T31N R12W, unit letter "E". Figure 1 is a topographic map showing the location of the site. The operator is Burlington Resources. This letter follows e-mail notification provided to you on Tuesday, March 2, 1999 (M. Gannon, PNM to B. Olson, OCD).

On February 10, 1999, a PNM environmental technician discovered groundwater at 60 feet below ground surface during vertical extent determination. A groundwater sample was collected and delivered to OnSite Technologies, Farmington, New Mexico. A hardcopy of the analytical results is attached and a summary of the BTEX constituent concentrations is provided below:

Component	Units	WQCC Stds.	Groundwater Sample
Benzene	ppb	10	17000
Toluene	ppb	750	32000
Ethylbenzene	ppb	750	820
Xylenes	ppb	620	6600
Total BTEX	ppb		56420

Bold type indicates a WQCC exceedance.

This letter serves as written notification of groundwater impact at the Davis #1. PNM will conduct future activities at the site pursuant to PNM's Groundwater Management Plan. If you have any questions, please call me at (505) 241-2974. Thank you.

Sincerely,
PNM Environmental Services

RE: Davis #1

Order No.: 9902052

Dear Maureen Gannon,

On Site Technologies, LTD. received 1 sample on 2/10/99 for the analyses presented in the following report.

The Samples were analyzed for the following tests:
BTEX (SW8021B)

There were no problems with the analyses and all data for associated QC met EPA or laboratory specifications except where noted in the Case Narrative.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

A handwritten signature in black ink, appearing to read "David Cox".

Subject: New Groundwater Site Notification- Davis #1

Please be advised that PNM has discovered a new contaminated groundwater site during vertical extent drilling.

Site name: Davis #1
Location: S11 T31N R12W Unit "E"
Operator: Burlington Resources
Depth to GW: 60'
Contaminant Concentration: benzene 17,000 ppb; BTEX 56,420 ppb

A written notification shall be made to OCD within 15 days with a hardcopy of the analytical results. In the meantime, if you have any questions, please call me at (505) 241-2974.
