Cause of Release: High pressure caused fluid to leak from iron coming off of a lateral on the main treating line. Approximately 10 bbls of fresh water mixed with scale inhibitor and biocide was released into the containment and was recovered by vacuum trailer. A 48-hour advance notice of liner inspection was provided by email to NMOCD District 2. The liner was visually inspected and the inspector located one hole. Additional delineation for deferral will be completed by a third party contractor.
