Subject: Deferral Approved- Shocker 32 State Com #3H Battery (2RP-5136) 12-14-2018
Attachments: Deferral Request Accepted (2RP-5136) 3.25.19.pdf

Adrian,

LT Environmental's closure report for the above release, requests to backfill the existing excavation and complete remediation during any future major well pad construction/alteration or final plugging and abandonment, whichever occurs first. The area requested for deferral is identified on the site map as "FS01". The area have been delineated and documented in the report. At this time, OCD approves this request. The Final Report C-141 will be accepted for record and marked accordingly. The release will remain open in OCD database files and reflect an open environmental issue. This is a State site and will require like approval from SLO.

Thank you,

Robert J Hamlet

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
