**Subject:** [EXT] 1RP 5492 48-hr sampling notification; unknown RP liner inspection notification

Hello Dylan et al.

On Tuesday, September 17, 2019, starting at around 12:00pm, I will be conducting a liner inspection at Devon Energy's Rio Blanco Central Tank Battery for a release that occurred on July 18, 2019. At this time, I have no RP number assigned to this release although it was reported at the time of incident.

Following the liner inspection, I will be conducting additional soil sampling at Rio Blanco 33 Fed 2 – 1RP 5492. The samples collected at that location are likely to serve as final confirmation samples, so please allow this email to serve as the requisite 48-hour notice of confirmation sampling activities.

If you have any questions regarding these releases, please give me a call at 580-514-9088.

Thank you!
