Re: 1R-3941 Remediation Plan and Assessment Report

All,

Regarding the above, and following relevant C-141 submittal to the pay portal:

Most recent Assessment and Remediation Plan Report October 2018 is approved with one Condition of Approval. This being:

No excavated soil impacted at all by release can be used for refill on any excavation activity.

Thank you for your efforts.

Sincerely,

Bradford Billings
EMNRD/OCD
Santa Fe, New Mexico

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations

Mr. Billings,

Scott Foord (Arcadis) has uploaded the applicable pages from the Form C-141 through the NMOCD Payment Portal; attached is the relevant documentation. He has also uploaded the *Site Assessment Report and Amended Proposed Remediation Strategy* to your FTP Drop Box.

During our review of the *Site Assessment Report and Amended Proposed Remediation Strategy* it was determined that the proposed remediation activities would meet the objectives of the NMOCD. The only exception was the proposed reuse of excavated soil not affected above the NMOCD Reclamation Standard. I was hoping that you might be able to approve the *Amended Proposed Remediation Strategy* currently in your drop box with the **condition that excavated soil in not reused**.

If you have any questions or need any additional information, please feel free to contact me by phone or email. Thanks Brad and it was a pleasure speaking to you yesterday.

Respectfully,

Joel W. Lowry
