[\(C-141 Closure\) NRM2010157543.pdf](#)

NRM2010157543 ABE UNIT #002 @ 30-025-34146

Melodie,

The OCD has denied the submitted Closure Request C-141 for incident # NRM2010157543 for the following reason:

- Unless a sampling plan was submitted to and approved by the division, confirmation samples should represent an area of no more than 200 square feet. I will approve the overspray areas for closure, however, area labeled as the "Concentrated Area" will require more sampling. I also recommend that at least one sidewall sample from the 2' Excavation (Figure 3B) be collected on the southern portion of the excavation near the point of release.

The Denied C-141 can be found in the online image file. Please review and make the required correction prior to resubmitting through the fee portal. If you have any questions or believe this denial is in error, please contact me prior to submitting an additional C-141.

Thanks,

Cristina Eads

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
