Ryan,

Your alternate sampling plan is approved.

Thanks,

Cristina Eads | 505-670-5601

Subject: [EXT] Excavation and sample collection on release NRM2026231125

Good morning Christina,

We are working with Tap Rock Operating on a produced water release (Incident# NRM2026231125) near Hobbs. We have begun excavation with the plan to dig and haul impacted soil to a licensed disposal facility. Environmental staff is on location and requests permission to collect one 5 point composite sample every 500 square feet based on field analytical results using PID and chloride strips indicates all excavated areas are under NMOCD Table I standards and the size of the excavation. Field notes, including PID and chloride strip data, will be included in the final C141 report.

Please let us know if this sampling plan is acceptable and we will proceed with the confirmation sampling. We will be happy to provide any additional information you require to make this determination.

Thanks for you time,

Ryan Bruner
