NRM2004437525 CAL-MON #0009 @ 30-015-27206

Wade,

The OCD has approved the Site Characterization and Remediation Plan for incident # NRM2004437525 with the following conditions:

- The SP4 area will need to be remediated to greater than 1 foot below ground surface.
- Confirmation samples will be collected as composite samples, representing an area of no greater than 200 square feet for floor samples and sidewall samples. At a minimum, at least one sidewall sample will need to be collected from each wall of the excavation. Individual grab samples will be collected from any wet or discolored areas.

The signed C-141 can be found in the online image data base under the incident #. Please let me know if you have any questions.

Thanks,

Cristina Eads

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
