Mr. Fields,

The OCD has approved the Remediation Plan C-141 for incident # NCH1834657063 with the following condition:

- The S-4 area will need to be remediated beyond 8 feet below ground surface (bgs), as the TPH concentrations at this location exceed the closure criteria at 8' bgs.

The signed C-141 can be found in the online image data base under the incident #.

Thanks,

Cristina Eads

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
