Re: Environmental Assessment Report of Well Location  
Westland Development Corporation #1 Well  
SW/4 SW/4 Section 21, T10N, R1E  
Bernalillo County, New Mexico

Dear Mr. Ambrogi:

Please find enclosed for your review a copy of the Environmental Assessment Report covering the sampling that was completed on the referenced well location. Please note that all samples analyzed for this project were below the limits established by the Resource Conservation and Recovery Act (RCRA) and the New Mexico Oil Conservation Division (NMOCD). To insure accurate and uniform sampling we not only took samples from the pits but also from different areas on and off the well location. The areas where samples were taken are shown on Plat #1, the last page of the report. Based on the sampling results the well location presents no environmental threat now or for the future and is ready for reclamation.

After you have reviewed the Environmental Assessment Report please let us know in writing so that we may start the reclamation work. Burlington would like to start this work as soon as possible.

If you have any questions or if I may be of further assistance, please give me a call at 505-326-9759.

Very truly yours,

A handwritten signature in black ink, appearing to read "Van L. Goebel".
