

OIL CONSERVATION COMMISSION

P. O. BOX 871

SANTA FE, NEW MEXICO

INSPECTION REPORT

August 6, 1952

LUBBOCK MACHINE CO.

RE: H. B. Colbaugh #1
SWSW Sec. 12-1N-12E
Torrance County

The above captioned well has today reached a total depth of 1126'. The formation here continues to be granite wash, being reddish to rust in color and containing a great deal of biotite and quartz.

Since the previous report, two additional crevices have been encountered. One of these necessitated backfilling six times, which backfills were 8 to 16' in thickness. Presently there is 700' of water standing in the hole.

The status of the well today is: Shut down for repairs.

E.A.C.

EUGENE A. CHAVEZ,
Geologist - District 4
