SWEETMAN & ADAY
DRILLING ASSOCIATES

Re: Cecil D'Spain #1
NENW Sec. 12-6N-6E
Torrance County

This well has reached a total depth of 148'. Drilling with cable tools is progressing favorably and the formation now is a hard to medium hard, vitreous, light gray to buff limestone. A small amount of water was encountered at 145', but this was not enough to hinder drilling.

EAC
EUGENE A. CHAVEZ,
Geologist, District 4
