17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1703.

On May 22, 1981 we ran a bong log and perforated from 3310-3318' ISPF. We subsequently acidized with 100 gallons of 7-1/2% FE Acid. We swabbed salt water and set a cement retainer at 3200'. We pressure tested to 1500 # surface pressure, then perforated 2222-2230' ISPF. These perforations were treated with 1000 gallons of 7-1/2% HCL Acid, and swabbed salt water. We set a cement retainer at 2195' and squeezed with 150 sacks 50-50 POZ, 2 % gel, 14.0 PPG cement. This job at 2400 maximum pressure which bled to 2100# and held. We perforated from 2150-2160 ISPF. We than acidized with 1000 gallons 7-1/2% HCL Acid and recovered salt water. We then pulled the tubing and shut the well in at the surface.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
