Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This well produces water from the Basin Fruitland Coal and Pictured Cliffs Formations. Daily water production totals approximately 155 Bbl/day.

The produced water is primarily transported by pipeline to a Richardson Operating Company disposal well and alternatively stored on location in an above ground storage tank. When the water is stored on location, Richardson Operating Co. trucks the water to the disposal well unless workload dictates that a third-party trucking company is needed to keep up with water. When water production exceeds the capacity of the Richardson injection wells, water is disposed of by Key Energy Services in their disposal facility.

Richardson Operating Company operates two active salt water disposal wells in the area: Salty Dog #1 (WDW-NW/NE Sec. 1, T29N, R15W) and Salty Dog #2 (WDW-NW/SE Sec. 5, T29N, R14W).

Copies of the NMOCD Injection Orders for each injection well should be on file.
