Release occurred due to the water tank overflowing. All released fluids were contained by firewall. Oil was recovered by vacuum truck on 07/23/2015.

*Describe Area Affected and Cleanup Action Taken.**

The affected area is the immediately area surrounding the tanks. The release was contained by the facility's firewall. A vacuum truck was called and to recover fluids that morning (01/23/2015).

Much of the impacted soil at this battery is a result of historic releases from the facility. Impacted soils will be removed and properly disposed in the coming weeks.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
