**RECEIVED**

By OCD District 1 at 8:58 am, May 18, 2015

Describe Cause of Problem and Remedial Action Taken.\*

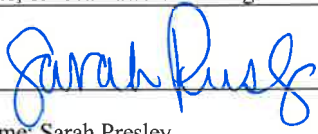

A man hole on the bottom of the heater treater blew a gasket.  
A Double R Vacuum truck arrived on location at 4:30PM.

Describe Area Affected and Cleanup Action Taken.\*

Approx. 9 bbls of oil and 10 bbls of water were released. A majority of the spill was contained within the berm, except for a few bbls of oil and some oil spray that was carried by the wind.  
A double R vacuum truck sucked up all oil inside the berm and the rain water outside of the berm that had oil on top of it.

We will take a sample of the soil inside and outside of the berm and send the results to Kellie Jones of the OCD. Once we have the sample results a final report will be submitted.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
