RECEIVED

By OCD District 1 at 8:21 am, Jun 01, 2015

If a Watercourse was Impacted, Describe Fully.*
N/A

Describe Cause of Problem and Remedial Action Taken.*
On May 24, 2015 2:00 AM Truck Driver for Lobo Trucking called in a spill at the Thistle Unit 47H, upon arrival Devon Lease Operator found that the flow line parted at the threads on the well head and released 10bbls of oil and produced water. The ESP was immediately shut down and the tubing and casing valves were shut in. 8bbls were recovered and the day pumper was notified of remaining clean up needed.

Describe Area Affected and Cleanup Action Taken.*
The area is 150ft x 200ft area from wellhead to the North of location. All fluid was contained on location and 8bbls were recovered by vac truck. Enviroclean has been contacted for the cleanup.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
