By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

RECEIVED

By OCD District 1 at 7:38 am, Jul 20, 2015

Describe Cause of Problem and Remedial Action Taken.*

Sales valve on the tank was not properly closed by the tanker truck driver, upon discovery of the release, the valve was immediately closed.

Describe Area Affected and Cleanup Action Taken.*

Crude oil flowed away from the tank and load line, affected the pad and surrounding area. A one-call has been made, all affected soil over NMOCD remedial limits will be excavated, disposed and the area will be backfilled. Bridger will submit documentation of remedial actions and confirmation sampling in a Corrective Action Report once all activities are complete.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
