Describe Cause of Problem and Remedial Action Taken.* Check valve failed causing the sump to overflow resulting in a release of crude oil.

Describe Area Affected and Cleanup Action Taken. The released crude oil impacted an area measuring approximately 30' x 60' inside the facility the released fluids then flowed west impacting an area measuring approximately 60' x 100'. The impacted area will be remediated as per applicable NMOCD guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
