By Whom?		Date and Hour			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

RECEIVED

By OCD District 1 at 2:21 pm, Sep 09, 2015

Describe Cause of Problem and Remedial Action Taken.* At approx. 7:30 am I pulled up to my battery and noticed a lot of produced water inside the location. I rushed to assess the problem and noticed that my water tank had overflowed due to the pumps not kicking on. The pumps never turned on because the head switch was hung up, both the alarm and the pumps head switches were hung up, therefore I never received an alarm to notify me that I had a high tank level, about 500 barrels of water has been spilt. 485 barrels was recovered. OCD has been notified

Describe Area Affected and Cleanup Action Taken.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
