RECEIVED

By JKeyes at 8:59 am, Oct 13, 2015

Describe Cause of Problem and Remedial Action Taken.* At approx. 6:30am leak was found, closet well was the CMU A #57. When I arrived water was spraying out of the ground towards the west. We got leak stopped and dug out and noticed a hole in the side of a fiberglass nipple.

Describe Area Affected and Cleanup Action Taken.* Leak was approx. 200' wide at the widest point, and approx. 500' long at the longest point. Leak sprayed out of ground towards west and ran downhill north, northeast. Approx. 168bbls spilled.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
