#### Describe Cause of Problem and Remedial Action Taken.\*

Produced water was released from water line due to corrosion. Wells producing to this line were immediately shut in to prevent further release. Clamp was placed on the corroded spot then the permanent repairs were made.

#### Describe Area Affected and Cleanup Action Taken.\*

12 BBLS of produced water and .5 BBL of oil was released affecting an area approximately 40' x 20'. 11 BBLS of produced water and .5 BBL of oil was recovered via vacuum truck. Produced water release originated from the water line running between the heater treater and water knockout. All released fluid remained on pad. Environmental agency will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
