If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Valve on circulating pump to circulating pot was left open, tank emptied into pot and onto floor of battery. Standing fluid was recovered and put back into system.

Describe Area Affected and Cleanup Action Taken.*

Saturated pea gravel was excavated and hauled to Sundance Services, a total of 1.5' was excavated and some contamination was left due to not compromising the integrity of the vessels. Permission from NMOCD was granted to take out enough of the contamination to leave the integrity of the tanks and vessels in place. In the future when this facility is abandoned the entire location will be remediated to standard.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
