NATURE OF RELEASE

Type of Release: Crude oil, Produced water, & Natural Gas	Volume of Release: Unknown	Volume Recovered: Unknown					
Source of Release: 4 inch steel pipeline	Date and Hour of Occurrence:	Date and Hour of Discovery					
	Unknown	Unknown					
Was Immediate Notice Given?	If YES, To Whom?						
🗌 Yes 🛛 No 🗌 Not Required							
By Whom?	Date and Hour:						
Was a Watercourse Reached?	If YES, Volume Impacting the Watercourse.						
🗌 Yes 🖾 No							
If a Watercourse was Impacted, Describe Fully.*							
Describe Cause of Problem and Remedial Action Taken.* A release occu	urred on the 4" inch lateral pipeline and	the release is historical.					
Describe Area Affected and Cleanup Action Taken.* From September 18, 2012 through December 11, 2013, a previous contractor excavated approximately 587 cubic yards (cy) of impacted soil from the area of impact. Impacted soil was transported to Sundance Services, Inc., in Eunice, NM, The area excavated by the previous contractor was left exposed and is referred to as, the existing remediation project. On January 29, 2016, six (6) preliminary soil status samples were collected from the existing excavation to determine the current levels of impact at the Release Site. Based on the field observations, it was determined the analytical results from soil samples collected on January 219, 2016 were likely not an accurate representation of the remaining soil impact at the Release Site. On March 8, 2016, a hand auger was utilized to collect additional soil samples for laboratory analysis. In addition, three (3) surface soil samples were collected from near or on the caliche well pad located immediately south of the Release Site. Based on the analytical results of soil samples collected on March 8, 2016, ETC conducted a soil investigation activities designed to vertically and horizontally delineate the Release Site.:							
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
