Describe Cause of Problem and Remedial Action Taken.* Circulating line developed a hole causing a release into lined containment. The circulating line was shut and oil was moved to a different tank in case of hole in current tank. Repairs are scheduled to be made.		
Describe Area Affected and Cleanup Action Taken.* Approximately 101bbls oil and 10bbls produced water was released from the circulating line into the surrounding lined containment. All released fluid remained in lined containment. A vacuum truck was called and recovered 101bbls oil and 10bbls produced water from containment. The containment was checked for holes and none were found. No further action is required.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
