Subject: RE: Sheridan - Monterey Battery (1R-4477) Work Plan Addendum
Date: Tuesday, January 10, 2017 7:59:45 AM

Aloha Ms. Flores et al,

Thank you for the updated information.

Based on this update and the prior workplan, the OCD approves a 2' excavation with further work to be conducted at retrofit, sale or abandonment (whichever comes first).

Please keep us informed.

Mahalo

一期一会

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: RE: Sheridan - Monterey Battery (1R-4477) Work Plan Addendum

Dr. Oberding,

In the Work Plan, submitted January 9, 2016, the following text in blue will be added and the text in red will be removed:

Page 1, Paragraph 4

DFSI has conducted a groundwater study of the area and has determined, according to the New Mexico Office of the State Engineer, ~~there is no known depth to groundwater~~ the

average depth to groundwater beneath this site is approximately 60 ft bgs (attached).

Please let us know if we can provide any additional information.

Thank you,

Subject: RE: Sheridan Monterey battery

Aloha all,

The OCD denies the current proposal.

The location within the work document (27S) does not match the location of the well (21S) or the original C-141 (21S).

Based on the sampling the OCD requests an addendum with new depth to groundwater information. Once that is provided the OCD would approve a 2' excavation with further remediation being addressed at time of retrofit, sale, or abandonment, whichever came first.

Please keep us informed.

Mahalo

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.
