Good Morning,

NMSLO will agree with NMOCD that remediation requirements have been met. Please be advised that this location is not fully closed with NMSLO until adequate vegetation is documented and submitted for full closure.

Thank you,

**Amber Groves**

Good Morning, Vernon,

Were there re-vegetation measures taken in the pasture area that was excavated?

Thank you,

**Amber Groves**

**Subject:** RE: Cambrian Mgt's Grand Banks Energy Anderson Ranch Unit #16 Closing Report

Dear Mr. Black:

Please be advised that for future closures, bottom and sidewall confirmation samples using Method 8015 extended for TPH (GRO, DRO, and MRO) and Method 300 for chlorides are required.

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-4422** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Like approval from SLO is required for this closure. SLO may have differing closure requirements for revegetation.

Thanks,

Olivia Yu  
Environmental Specialist  
NMOCD, District I  
[Olivia.yu@state.nm.us](mailto:Olivia.yu@state.nm.us)  
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
