Mr. Brunson:

NMOCD approves of the delineation and proposed remediation for 1RP-4589 with one condition: Bottom confirmation samples with Method 8015 extended (GRO, DRO, and MRO).

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
