Subject: RE: State P Battery 003 1R-4466 Sundown Energy

Good morning Mr. Alves:

NMOCD approves of the proposed delineation and remediation for 1RP-4466. Laboratory analyses (BTEx, TPH extended, and chlorides) of sidewalls and bottom confirmation samples are required for each of the excavated areas.

Please see the attachment for your records.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Per our conversation yesterday,

To document what we talked about yesterday, Conditions of Approval will be as follows.

Sp1-3 & Sp6-12 will be excavated to the proposed depths as in proposed work plan.

Sidewalls & bottoms will need to be taken.

Sidewalls will be submitted with a new map before backfill is performed and NMOCD and SLO approval will be required for backfill to commence.

The area of the Battery will be fully delineated during excavation due to safety issues. After backfill is approved by NMOCD and SLO and full delineation is accomplished.

If you have any questions or want to add anything please let me know

Thank you
