Good morning,

We had to do some additional sampling, which has been completed, and I will get the new workplan to you ASAP.

Good Morning, Christine,

I am in need of an update on this location. I am also still in need of the re-written work plan with a revegetation plan included.

Thank you,

Amber Groves

Good Afternoon, Christine,

Your work plan cannot be approved as written with NMSLO. I am in agreement with the requirements set forth for approval by NMOCD. The following are additions to those.

1. Your work plan states it is BLM land. It is actually state land.
2. A revegetation plan for the pasture area will be required and will need to be a part of the NMOCD submitted work plan.

Please copy me on all correspondence related to releases on state trust land in the future.

Thank you,

Amber Groves

Subject: RE: Laguna Deep 7

Dear Ms. Alderman:

Dr. Oberding and I have conferred about the workplan for 1-RP4455. The workplan would be approved with these conditions. Please confirm.

- 1) Approved: only the area surrounding the battery (SP 4 & 5) can be excavated to 3 ft. bgs and backfilled with clean material before placement of a liner.
- 2) Denied: A gypsum liner is not suitable.
- 3) Vertically delineate SP2 and 3 until chloride levels of 250 mg/kg is reached + 10 ft. bgs. A combination of OSE and Chevron trend map suggest depth to GW < 100 ft.
- 4) Horizontal delineation: add one more sample location between SP2 and SP3.

Let me know if you have questions/want clarification.

Thanks,

Olivia Yu
Environmental Specialist

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: Laguna Deep 7

Ms. Yu,

Thank you for your time this morning. As per our conversation regarding the Laguna Deep #7 battery, we will begin reconstruction of the battery. I will wait to hear back from you on sample points 2 and 3 for remediation.

The RP for this release is 4455. The RP for the Laguna Deep 16 is 4456.

Respectfully,

Christine Alderman
