---

Good Evening,

Devon had the following releases occur beginning at 2:14 PM MST on 10/24/17. The incident is described below.

1. Arabian 30-19 Fed Com 1H (API #30-025-43176)
  - a. A contract company was pigging the layflat line from the Arabian 30-19 Fed Com 1H to the Trionyx pond (Lat: 32.15486, Long: -103.74124). They had completed the line from the location to their booster pump, after rigging up to pig from the booster pump to the Trionyx pond there was some air in the line which caused the line to come out of the pond and allowed fluid to be release to the ground from the line. The contract company shut down operations and notified Devon personnel. Approximately 50bbls of produced water ran off the side of the pond onto the Trionxy facility. A vaccum truck was dispatched and recovered 40 bbls of produced water.

A C-141 will be prepared and submitted with GPS coordinates of the areas affected.

Thanks,

**Mike Shoemaker**  
EHS Representative
