Good Afternoon,

I have that the battery is located on state surface. NMSLO agrees with the stipulations set forth by NMOCD.

Thank you,

Amber Groves

Subject: RE: OXY State A&B Battery (1RP-4650) - Delineation Workplan

Dear Mr. Brunson:

Notes:

- The battery is located on Fee surface. NMSLO can confirm.
- Based on the release location, the average depth to groundwater is 49 ft., not 69 ft.

NMOCD will consider the delineation as completed for 1RP-4650. The proposed remediation is not accepted.

- Permissible TPH levels are 100 mg/kg. The proposed excavation must be 3 ft.
- Laboratory analyses of confirmation sidewall and bottom samples must demonstrate permissible limits for BTEX, TPH extended (GRO, DRO, MRO), and chlorides.
- Establish sidewall and bottom sample locations <= 50 ft. apart.
- In the remediation report, include an appropriately scaled map with the confirmation sample locations marked with GPS coordinates and the depth of excavation annotated.

Please confirm or inform for clarification.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: OXY State A&B Battery (1RP-4650) - Delineation Workplan

Olivia and Amber,

Please find the attached Delineation Workplan and remediation proposal for the OXY State A&B Battery (1RP-4650). OXY is requesting that you review this plan and is looking forward to both the OCD's and SLO's approval.

If you have any questions, please let me know.

Thanks, Cliff
