Hello All:

Pleasant to meet with you again this morning. Just so that all parties are on the same page, during the meeting, we agree upon these items:

1. Completion of vertical delineation at DS-2 at 3 ft. bgs for chlorides to approximately 600 mg/kg.
2. Test the Microblazed-treated soil around HP lines for TPH extended.
3. Backfill will commence after laboratory results for points 1 & 2 are received and approved by NMOCD and NMSLO.

If there is any missing information or corrections are necessary, please inform.

Thanks,
Olivia

Ms. Yu,

How does 10:00 AM sound? That would work well for Camille and I. I'm not sure that the NMSLO would need to be present at this point, but if Amber isn't busy we would be glad to meet with her also. Please feel free to let her know that we will be in. Thanks.

Respectfully,

Joel Lowry

Joel:

When do you anticipate stopping by? I am available between 9-11 am MST. Do you need NMSLO to be present?

Thanks,

Olivia

Olivia,

I wanted to see if you might be available to meet with Camille and I tomorrow morning sometime to discuss the Alpha A-2 Main remediation project.. Camille and I have a small break in our schedule that morning and will be working in the area. Thanks!

Respectfully,

Joel Lowry

Subject: RE: 1RP-4813 - Alpha Gathering A-2 Main - Remediation Summary and Permission to Backfill Request

Mr. Lowry:

NMOCD approves of the delineation and backfill request for 1RP-4813 with several stipulations:

- A request for a sample at 3 ft. bgs at DS-2 for chloride analysis.
- Is there a proposal to resample the HP area with Microblaze? If so, what is the estimated timeline for resampling? If not, is this area feasible to hydrovac?
- In the closure report, include a scaled map with the demarcating the areas with different excavation depths.

Please confirm or inform if clarification is requested.

Thanks,

Olivia
