This is just for the South Recycling containment. We do not currently have water in the North Recycling containment.

Mr. Tupman:

Is the reported volume combined for the North and South Recycling containments?

Thanks,
Olivia

Ms. Yu,

Attached you will find the first C-148 for the Red Hills Recycle Facility for the month of November. Let me know if there are any issues or if I need to submit this to someone else.

Thanks

Subject: RE: Red Hills C-147 Application

Dear Mr. Tupman:

Notes:

- Based on the GPS coordinates provided on the C-147 registration application, the recycling facility is located in NW/SE (J) of Section 16, not SE/SE (P). If incorrect, please inform.
- Red Hills Draw is approximately 3,050 ft. SE. This is considered a surface water body.

NMOCD has reviewed the submitted documents, dated July 18, 2017, encompassing the C-147

Registration Package for Red Hills Recycling Facility and two Recycling Containments (North & South). The recycling facility and two recycling containments will be located in Lea County; U/L J, Section 16, Township 26S, Range 32E.

NMOCD approval is given for the proposed Red Hills Recycling Facility, North Recycling Containment, South Recycling Containment, and the Variance indicated (use of audible bird protection instead of netting). Please be advised that this email message serves as documentation for approval. A hard copy will not be sent.

The Recycling Facility is issued an identifier **1RF-19**, North Recycling Containment **1RF-20**, and South Recycling Containment **1RF-21**.

Monthly usage reports on the form C-148 are expected electronically to NMOCD- District I office. NMOCD also may ask for periodic updates on containment conditions and inspection logs. For future communications, please remember to include the identifier **1RF- 19, 1RF-20, and 1RF-21** for tracking and record-keeping purposes.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: Red Hills C-147 Application

I have attached the Red Hills C-147 with the changes requested.

The figures for both karst and distance to surface water are more legible, I have added the bore-hole log that was performed as well as the specs for the audible avian protection device.

Let me know if there are any more questions. Also, if you could, give me a general timetable for approval to help with planning on our end.

Thanks for your time,

Tyler Tupman
