Subject: RE: URGENT: Madera 19 Federal #1 - Work Plan - Approval Request
Date: Wednesday, February 28, 2018 12:04:00 PM
Attachments: approved_1RP4959_Marathon - Madera 19 Federal #1 FINAL Work Plan.pdf

Mr. Tavarez:

NMOCD approves of the delineation completed for 1RP-4959. For remediation, bottom and sidewall confirmation samples are required. At least 1 bottom within the bermed area and one outside. Please demarcate sample locations with GPS coordinates.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

BLM accepts your proposal as written.

Like approval from NMOCD will be required as well.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shelly J Tucker

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Olivia and Shelly,

Here is the Work Plan for the Marathon Madera Federal #1 located in Lea County, New Mexico. Marathon will be removing the condensate tank from the area this week for replacement of the tank. For access of the impacted soils, Marathon would like to excavate the soil immediately after the tank is removed from the area. Tetra Tech will be moving forward next week on excavating the impacted soils from the area, as proposed in the work plan. Once completed, the excavated area will be backfilled with clean soil. Let me know if you have any questions on the proposed work plan. Once completed, a closure report will be prepared and submitted for you review.
