NMSLO approves of the delineation plan for 1RP-4259. NMSLO database indicates state owns both surface and minerals, not sure what is up with that.

Good morning Ms. Johnson:

NMOCD approves of the proposed additional delineation plan for 1RP-4259 with one modification. Current delineation and remediation levels for chlorides is 600 mg/kg. NMOCD sincerely appreciates the additional 10 ft. for verification that chloride levels are maintained.

NMOCD database indicates State surface and minerals reserved to Federal. NMSLO and BLM can verify.

Thanks,
Olivia
