Re: AP-82 Texaco Mattern Battery #26

Hello Brad,

As per your request:

The Oil Conservation Division (OCD) approves of the locations indicated within the 2107 Annual Report. Please notify District Office with two days' notice prior to field activities.

Thank you for your efforts. If these locations prove problematic in the field please contact this office.

Sincerely,

Brad Billings
EMNRD/OCD
Santa Fe

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations

Good afternoon Mr. Billings,

I wanted to touch base with you and see if you've had a chance to review our plans for further delineation proposed in the 2017 Annual Groundwater Monitoring Report.

Good afternoon Mr. Billings,

We are attempting to coordinate the previously-approved plugging of monitoring wells at the WP Byrd site (AP-30) and Arco Phillips (1R-406) site with the installation of the two proposed monitoring wells at Texaco Mattern (AP-82). Before we schedule those activities, I wanted to confirm if you approve of the monitoring well locations proposed in the 2017 Annual Groundwater Monitoring Report.

Good afternoon Mr. Billings,

Attached is the 2017 Annual Report for AP-82 Tecaco Mattern Battery #26. Please note that we are proposing the installation of two more monitoring wells downgradient of MW-13 to complete the delineation of impacted groundwater.
